There is no such app folder anymore, your project folder now is the app folder so to speak, and the dependencies (such as the CakePHP core) are located in the vendor folder (vendor/cakephp/cakephp). - ndm Jul 8 '15 at 13:50

php - CakePHP 3 manual installation - Stack Overflow

I'm gearing towards CakePHP while browsing ZendF. Zend is ALOT scarier for a n00b. Although i'm not a n00b, I found reading the cakePHP manual vs the zendf manual was much easier. What's the point of a manual of it does not "build" on previous chapters. There's just too many things to learn in zend.

History of CakePHP¶ In 2005, Michal Tatarynowicz wrote a minimal version of a Rapid Application Framework in PHP. He found that it was the start of a very good framework. Michal published the framework under the MIT license, dubbing it Cake, and opened it up to a community of developers, who now maintain Cake under the name CakePHP.

Introduction to CakePHP - 1.1

Returns either a relative or a formatted absolute date depending on the difference between the current date and this object. Options: from => another Date object representing the "now" date; format => a fall back format if the relative time is longer than the duration specified by end; accuracy => Specifies how accurate the date should be described (array)

Class Cake\I18n\FrozenDate | CakePHP 3.7

Returns a formatted string for this time object using the preferred format and language for the specified locale. It is possible to specify the desired format for the string to be displayed.
