4. Strings and Characters . A string in Emacs Lisp is an array that contains an ordered sequence of characters. Strings are used as names of symbols, buffers, and files; to send messages to users; to hold text being copied between buffers; and for many other purposes.

GNU Emacs Lisp Reference Manual: Strings and Characters

I just tried info-apropos. It seems to search all info doc, but elisp-index-search only search elisp manual. I tried to find the doc for elisp-index-search but wasn't successful. I learned about it by calling describe-key on the menu [Help->Search Documentation->Lookup Subject in Elisp Manual...]

Info - How to search the Emacs Lisp Reference Manual ...

36.4 Creating an Asynchronous Process. In this section, we describe how to create an asynchronous process. After an asynchronous process is created, it runs in parallel with Emacs, and Emacs can communicate with it using the functions described in the following sections (see Input to Processes, and see Output from Processes). Note that process communication is only partially asynchronous: Emacs ...

GNU Emacs Lisp Reference Manual: Asynchronous Processes

Notes: elisp manual says face name should not end in "-face" and reason being "redundant". Face Attributes (styles) You can specify font, size, weight, text color, background color, underline, overline, border, slant (italic), etc.

Elisp: How to Define Face - ErgoEmacs

37.11.6 ImageMagick Images. If you build Emacs with ImageMagick support, you can use the ImageMagick library to load many image formats (see File Conveniences in The GNU Emacs Manual). The image type symbol for images loaded via ImageMagick is imagemagick, regardless of the actual underlying image format.. Function: imagemagick-types This function returns a list of image file extensions ...

GNU Emacs Lisp Reference Manual: ImageMagick Images

This tutorial covers emacs-lisp, more extensive than any existing emacs-lisp book (except the elisp manual) or elisp tutorial online. A little elisp makes you a far better emacs user and understanding emacs. [see Practical Emacs Lisp] There are more examples and elisp code in Xah Emacs Tutorial than all existing emacs books or web sites combined.

Practical Emacs Tutorial - ErgoEmacs

The source and XSLT stylesheet used to generate the manual is available in file elisp-manual.tar.gz and they can be used under GPL license. The stylesheet requires an XSLT processor supporting xsl:document element for multiple outputs (e.g. Saxon).

elisp reference manual - Zvon.org

Read the Emacs Lisp Reference manual: EmacsLispReference. Use 'C-h i' ('info'), then choose 'Elisp' . You can also read this manual on the Web or as a portable epub book .
