Commodity prices. Some of the economists have attributed the global financial crisis to the hike in essential commodities such as oil. The rise in oil prices had a ripple effect in all the other commodities and soon most consumers could not afford essential purchases. This in turn affected the producers and employees.

bursting of the United States housing bubble and the subsequent subprime mortgage crisis, which occurred due to a high default rate and resulting foreclosures of mortgage loans, particularly adjustable-rate mortgages.

Financial crisis of 2007-2008 - Wikipedia

Access Free Financial Crises Causes Consequences And Policy Responses

A financial crisis is any of a broad variety of situations in which some financial assets suddenly lose a large part of their nominal value. In the 19th and early 20th centuries, many financial crises were associated with banking panics, and many recessions coincided with these panics. Other situations that are often called financial crises include stock
