Quick Fuel Technology® (QFT™) ships carburetors only after they have been thoroughly run-tested and adjusted on a typical engine. Engine testing all carburetors prior to shipment ensures that when a new QFT™ carb is bolted on an engine, it will start, idle and perform up to the customer's expectations. However, sometimes a little more fine-tuning is needed because the customer has a ...

Holley carbs come with a standard shooter size which differs by carb list#. If you are experiencing a bog or hesitation off idle, you can try a larger, higher # shooter size. The bog or hesitation may be caused by a momentary lean condition when the carb goes from the idle throttle position to the main metering system.

Over the past 50 years, the venerable Holley carburetor hasn't changed much. It's simple design and near infinite adjust-ability have long made it a favorite among enthusiasts. While EFI tuners routinely use this new technology with great success, surprisingly few carb owners have warmed up to the idea yet.
