Chapter one

Refer to the exhibit.

The network administrator creates a standard access control list on Router1 to prohibit traffic from the 172.16.1.0/24 network from reaching the 172.16.2.0/24 network while still permitting Internet access for all networks. On which router interface and in which direction should it be applied?

How to Access Your Wi-Fi Router's Settings | PCMag

Accessing your home router from inside the network is easy. Simply type in your router's IP address (usually 192.168.1.1 or 192.168.0.1) in the web browser. But, how about accessing your router remotely? Now, before we come to that, let's take a look at some of the reason,
