Step 1, Cut an aluminum can to about 2 1/2 in (6.4 cm) tall. Use tin snips or shop scissors to make a smooth horizontal cut about 1/3 of the way up from its base and around the can's circumference. Step 2, Fold and crimp the cut rim with pliers. Fold the rim on each piece of the can in on itself to eliminate its sharp edges. Take care not to cut yourself as you do so. Step 3, Push the bottom of the can out from the inside to flatten it. Most soda cans have a circular base that ...

Engine Block (Cylinder Block) The engine block is the foundation of an engine. Most engine blocks are cast from an aluminum alloy, but iron is still used by some manufacturers. The engine block is also referred to as the cylinder block because of the big hole or tubes called cylinders that are cast into the integrated structure.
