### Network Analysis in Archaeology: New Approaches to ...

Over the past few decades, archaeologists have increasingly problematized the cultural "spheres," "horizons," and, yes, "networks" that linked different groups together in the past. We now readily recognize that processes such as romanization were far more complicated and dynamic than initially described, and we acknowledge our ignorance of the intricacies of the bridle's spread ...

Network analysis in archaeology : new approaches to regional interaction. [Carl Knappett; Society for American Archaeology. Annual Meeting;] -- "While the study of networks has grown exponentially in the past decade and is now having an impact on how archaeologists study ancient societies, its emergence in the field has been dislocated.

### Network analysis in archaeology : new approaches to ...

Network Analysis in Archaeology brings together a number of the leading figures in archaeological network analysis to explore what 'networks' mean for archaeology, what a network perspective might offer the practice and interpretation of archaeology, and to offer the results of case studies ranging in space and time from across the globe.

### Network Analysis in Archaeology: New Approaches to ...

Social network analysis (SNA) in archaeology has become important for a range of theoretical and methodological approaches that can more generally be characterized as relational. They are relational in that it is the ties between actors (or nodes) that define social connections. Archaeologists are currently employing a diversity of theoretical approaches to networks, and the perspective taken in this review is that SNA can provide insights into a number of different social processes using ...
