New Lipid Guidelines

New Lipid Guidelines Summary

The following are guideline recommendations for statin treatment:

Patients ages 20-75 years and LDL-C \geq 190 mg/dl, use high-intensity statin without risk assessment. T2DM and age 40-75 years, use moderate-intensity statin and risk estimate to consider high-intensity statins.

New Lipid

Guidelines

Summary

Thanks to efforts made in different parts of the world, the intake of trans fatty acids has decreased substantially over the past 10-15 years. As for saturated fat, its consumption should be <10% of the total caloric intake and should be further reduced (<7% of energy) in the presence of hypercholesterolaemia.
