As mentioned, intellectual disabilities (ID, formerly mental retardation) have two key diagnostic criteria. These are intellectual functioning (IQ) and adaptive functioning. Tests of adaptive functioning evaluate the social and emotional maturity of a child, relative to his or her peers. They also help to evaluate life skills and abilities.

### Tests of Adaptive Functioning - Intellectual Disabilities

Adaptive skills come from adaptive behavior, or the conceptual, social, and practical skills that individuals have learned and use in their daily lives. These skills, in addition to Intelligence Quotient (IQ) scores, are assessed by professionals in diagnosing an intellectual disability.
