I am basically HOPING to have a french and english version of text in one html file, the user being able to select the language, so if you are in the english version it would link to the english version of the next page, the french version would link to the french version in the next page. The links would link using a hashtag for example

### javascript - Multiple Pages in Single HTML with continuity ...

While a single page site may improve relevancy for your primary keywords, it's more likely it will dilute relevancy for sub-topics and terms that might rank better, or at all, on their own pages. Defining content sections and using anchor links is the suggested method for increasing single-page SEO. Using H1 tags is also highly advised.

### Single-Page vs. Multi-page UI Design: Pros & Cons

HTTP defines a set of request methods to indicate the desired action to be performed for a given resource. Although they can also be nouns, these request methods are sometimes referred to as HTTP verbs. Each of them implements a different semantic, but some common features are shared by a group of them: e.g. a request method can be safe, idempotent, or cacheable.

The reported difference in suicide rates for males and females is partially a result of the methods used by each gender. Although females attempt suicide at a higher rate, they are more likely to use methods that are less immediately lethal. Males frequently complete suicide via high mortality actions such as hanging, carbon-monoxide poisoning, and firearms.
