### Hydroponics for Beginners: The complete step-by-step guide ...

In hydroponics, water and a solution of nutrients do all of the work to make the plant grow...there is no soil! The picture to the right is an example of one of the most basic types of hydroponics systems, a passive irrigation setup. In this setup, the plants are held in place by a growing medium (in this case perlite is being used).

### The Essential Hydroponics for Beginners Guide | Epic Gardening

Another beginner-friendly hydroponic system, the Ebb & Flow is also known as the drain and flow method. With this particular type of hydroponics, the nutrient solution is contained within a reservoir. Meanwhile, the reservoir is placed right under the growing tray.

### Beginner's Guide to Growing Marijuana in Hydroponics

Throughout the growing process, you will need to control several factors, such as lighting, water quality, air circulation, and more. Three systems are suitable for beginners: the wick system, the water culture system, and the ebb and flow system. More advanced systems include the nutrient film technique and the aeroponic system.
