RAILROAD CO

ATCS is an acronym for Advanced Train Control System. It is my belief that the various railroad operating control systems such as CTC, PTC, and so on will ultimately be one system that monitors rail traffic and will provide the ability to control the locomotive as well as providing a dispatcher a view of how the railroad is operating.

the railroad dispatcher program 3_| Documentine.com

I follow the JMRI Yahoo group but haven't started reading the manual. Last week I visited a layout in Chehalis WA that uses Railroad & Co. software to computer control their club layout and it looked and worked great. I also visited the freiwald.com (Railroad & Co.) web site and was knocked over
