higher the risk of developing lung cancer. However, about one-fifth (21%) of people who are diagnosed with lung cancer have never been smokers.2 Second-hand smoking - Breathing in other people's tobacco smoke (passive or second-hand smoke) can cause lung cancer. Living with a smoker increases a nonsmoker's risk by 20–30%.3 Key questions 9

Understanding Lung Cancer
Lung cancer is a global problem fueled by the continuous use of tobacco in most countries, despite efforts at expanding smoking cessation programs. Several advances in the diagnosis and treatment of lung cancer were achieved in the past decade. This progress notwithstanding, most lung cancer patients succumb to their illness, and few enjoy long-term survival.
