inside another app, without any notification or direct notice to the consumer, and can be used to track glitches and clicks.

Firestore - Wikipedia

Firestore might protect from malicious spamming, but simply setting a fake score in a game doesn't seem like something that can be fixed without server-side code. In the Tetris example, malicious clients can just reset the board whenever they want.

How I hacked a Firestore leaderboard in 5 minutes - Google ...

Firestore is a Backend-as-a-Service — BaaS — that started as a YC11 startup and grew up into a next-generation app-development platform on Google Cloud Platform.. I've been using Firestore since 2013. I was late to the game :) I use Firestore to power my family's business, Calligraphy.org. I also use it for everything I've developed in the last three years.

Sign in - Google Accounts - Firebase

Sign in - Google Accounts - Firebase

A quick guess: calling `signOut()` signs the user out of Firebase Authentication. It does not sign the user out of the underlying social provider (e.g. Facebook, Google). So next time you start the sign-in flow for that provider, it will be picked up immediately by your code (or the library that you used).
