Lab 9 Transpiration & by Merissa Ludwig - BIOLOGY JUNCTION

Transpiration Lab Introduction: Transpiration is the term that describes the evaporation of water from a plant. The water that is lost by transpiration is conducted up through the plant by vascular tissue called xylem. Various factors can affect the rate of transpiration. Those factors include the amount of light, temperature, and humidity.

Topic 7: Plants - 7c. Transpiration Lab

I can't answer the third question without looking at the lab. My guess would be that you need to calcuate the leaf surface area in tabulating the results because the larger the surface area of the leaf the more water will escape the stomata, therefore the two are related. I hope that helped!
